

## EnCase Mobile Investigator

# MORE APPS. MOST DEVICES. ALL EVIDENCE.

The industry standard in digital forensics now offers mobile device forensics.

Investigators now have a unified solution, end-to-end, for their forensic investigations.

We know that many of your investigations include mobile devices, and now with EnCase Mobile Investigator, you can intuitively review, analyze, bookmark, and report all mobile evidence relevant to your case within a single framework. It's specifically designed to enhance the way investigators review critical mobile device evidence. Best of all, it's built with a deep understanding of evidence integrity, so that you can seamlessly complete any investigation with peace of mind. With evidence support ranging from text messages, call records, photos to application data. EnCase Mobile Investigator empowers investigators to seamlessly work the case thoroughly and efficiently.

### Device Support

Gold-Standard acquisition of mobile evidence from all smartphone operating systems. With more than 26,000 device profiles supported, EnCase Mobile Investigator can collect from more mobile device profiles than any other tool on the market.

### Optimized Analysis

## Key Benefits

### Intuitive Evidence Review

With EnCase Mobile Investigator, examiners can easily review parsed mobile device evidence from the widest variety of mobile devices including text messages, e-mails, call records, cloud repositories associated with mobile device, internet history, photos, application data, and deleted data.

### Powerful OCR

EnCase Mobile Investigator empowers investigators to find, extract, and analyze data within graphic files using Optical Character Recognition. Evidence from graphic files such as PDFs, photos, and other file types will be found when running keyword searches, ensuring you can uncover critical evidence no matter how it is stored.

### Unmatched Support

Investigators need a reliable forensic solution that they can use when it comes to any investigation involving a mobile device. With frequent operating system and application updates in EnCase Mobile Investigator, examiners can keep up with the constant evolution of mobile devices and mobile applications that they come across.

### Powerful Cloud Application Visibility

Gathering data from social networking applications and cloud data sources tied to mobile device may be critical for an investigation to prove a suspect's guilt or innocence. With the appropriate permissions, investigators can use EnCase Mobile Investigator to gather and review evidence from a suspects cloud-based account such as Google Drive, Twitter, Facebook, and others. This powerful feature enhances and extends the capabilities and reach that investigators possess.

### Unrivaled Access

Many devices that investigators are faced with are either locked or contain a password. EnCase Mobile Investigator empowers the investigator by offering several built-in bypass functions for select phones so that no evidence within a device can be hidden and unable to access.

### Robust Search

As investigators find evidence, there is a continuing trail for them to search for more. With the Regular Expression Review feature included with EnCase Mobile Investigator, investigators can locate credit cards, e-mail addresses, and phone numbers to find that extra piece of evidence to help finalize their collection.

### Comprehensive Data Support

With EnCase Mobile Investigator, comprehensive set of data sources including SQLite, Plists, archives, PDF, HTML and more can be investigated using the file viewer feature. This allows investigators to gather the widest variety of evidence needed for their case, including all data associated with a wide variety of apps.

### Simplified Report Generation

Once all relevant evidence is accounted for, investigators can create an intuitive report. There are several customizable reporting options offered with EnCase Mobile Investigator including HTML, Timeline, PDF, and many other report variations. These reports are created to be shared in a compelling and easy to read way for every case.

*From beginning to endpoint.*

## ABOUT US

Guidance (NASDAQ: GUID) exists to turn chaos and the unknown into order and the known-so that companies and their customers can go about their daily lives as usual without worry or disruption, knowing their most valuable information is safe and secure. The makers of EnCase®, the gold standard in forensic security, Guidance provides a mission-critical foundation of market-leading applications that offer deep 360-degree visibility across all endpoints, devices and networks, allowing proactive identification and remediation of threats. From retail to financial institutions, our field-tested and court-proven solutions are deployed on an estimated 34 million endpoints at more than 70 of the Fortune 100 and hundreds of agencies worldwide, from beginning to endpoint.
