

MAGNET AXIOM™ + GRAYKEY

AXIOM is the only tool integrated with GrayKey to get the most iOS evidence

AXIOM and GrayKey—The most advanced solution for iOS investigations

Magnet Forensics and Grayshift, makers of GrayKey, have an exclusive worldwide technology and distribution partnership to offer law enforcement agencies the most advanced investigations on iOS devices available today.

Combined with GrayKey's industry-leading iOS acquisition, AXIOM gets the most data and provides the best analysis for iOS devices. And with GrayKey integrated directly into AXIOM, loading iOS evidence is easier and more efficient.

STREAMLINE PROCESSING OF GRAYKEY IMAGES

- Quickly and easily load GrayKey images for analysis directly from AXIOM.
- AXIOM automatically validates that the files were correctly loaded using the images hashes, and you can choose the image components you want to process.

EXAMINE THE FULL CONTENTS FROM iOS DEVICES

- Analyze the full file system (including iTunes backup-style images), decrypted Keychain, and memory from iOS devices and find evidence that other tools miss.
- AXIOM natively supports the analysis of memory from GrayKey images without the need to install third-party conversions or plugins.

FIND THE MOST RELEVANT EVIDENCE POSSIBLE

- Thanks to the powerful carving within AXIOM, you can find more pictures, chat, and browser history.
- Uncover detailed subject information with artifacts like KnowledgeC, iOS Wallet, geolocation data, Screen Time, and more.
- Discover new artifacts with Dynamic App Finder to automatically scan your file system and memory images for relevant chat, browser, geolocation, and identifier data.

LEVERAGE POWERFUL BUILT-IN ANALYTICS TOOLS

- Analyze evidence from GrayKey images alongside data from other computer, cloud, social media, and mobile evidentiary sources.
- Built-in Analytics features like Connections, Timeline, and Magnet.AI automatically generate insights that could lead to important breakthroughs in your case.

GrayKey is now available for purchase from Magnet Forensics in select countries worldwide, and is only available to law enforcement agencies.
